Education

University of Illinois Urbana-Champaign

GPA: 3.84/4.00 | Dean's List | Expected Graduation: May 2028

Bachelor of Science in Mechanical Engineering, Minor in Computer Science

Technical Skills

CAD & Design: Fusion 360, Creo Parametric, GD&T, Design for Manufacturing, Engineering Drawings, FEA Fundamentals

Programming: Python, C++, Java, NumPy/SymPy, HTML/CSS/JavaScript, Git/GitHub

Manufacturing & Prototyping: FDM 3D Printing, Slicer Setup, Resin Casting, CNC Machining

Lab & Test Equipment: Oscilloscopes, Microscopes, Multimeters, Vibration Tables, G-Shock Towers, Thermal Chambers

Experience

Motorola Solutions

May 2026 – Present

Battery Cell Engineering Intern

Schaumburg, IL

- Supported lithium-ion cell safety testing using thermal, vibration, shock, microscopy, and electrical test equipment.
- Evaluated cell performance, charging behavior, and safety response to support battery characterization and product compliance testing under senior electrical and mechanical engineers.

University of Illinois Urbana-Champaign

January 2026 – May 2026

Mechanical Engineering Research Assistant, Combustion Diagnostics Lab

Champaign-Urbana, IL

- Designed and fabricated utility fixtures for UIUC's off-campus combustion research, creating Fusion 360 models, 3D-printed mounting components, and aluminum assemblies for HVAC, electrical, and laboratory instruments.
- Gathered researcher requirements and developed budget-conscious fixture designs to improve laboratory usability and experimental setup efficiency.

Tiptek, LLC

October 2025 – January 2026

Laboratory Technician

Champaign, IL

- Manufactured and aligned 90+ tungsten nanoprobe per shift using precision tools for semiconductor failure analysis
- Performed optical and digital inspection to verify nanoprobe geometry and tip radius at sub-10 nanometer scale

Do it Best Hardware (formerly True Value)

May 2024 – August 2025

Senior Sales and Technical Associate

Palatine, IL

- Promoted after acquisition to lead technical service operations and employee mentorship
- Served as shift lead during management transitions, managing store operations and assigning tasks for coordination
- Trained and mentored 8+ employees in safety procedures, customer service, and technical services

True Value Hardware Inc

July 2023 – May 2024

Hardware Sales and Service Associate

Palatine, IL

- Provided hardware solutions and recommendations for an average of 50-70 customers per shift
- Managed inventory and processed special customer orders, maintaining accurate stock levels across 2000+ SKUs
- Handled specialized services such as key duplication, paint matching, screen repairs, and cutting/rethreading pipe

Involvement

ASME Product Development Team

August 2025 – November 2025

- Collaborated with Professor Micky Clemons to design and prototype a more cost-effective robotic 3D print arm
- Evaluated manufacturing, design, and material options to reach performance goals within a \$10,000 budget

UIUC Robotics Club

August 2024 – May 2025

- Designed and 3D-printed a 1lb combat robot with Fusion 360, optimizing for weight reduction and weapon strength
- Soldered and assembled drivetrain electronic components to ensure reliability in high-impact environments

Projects

3D Printed Resin-Finished Electric Guitar

June 2025 – August 2025

- Modeled an electric guitar body in Fusion 360 with integrated cavities for pickups, wiring, and control components
- Iterated CAD geometry and print orientation for structural rigidity, component fitment, and post-processing quality.
- Fabricated the body using FDM 3D printing and reinforced it with a poured resin finish for style and durability

Electric Ride-on Toys Performance Modifications

January 2020 – January 2022

- Installed brushless electric motor upgrades on ATV's and Electric Scooters
- Wired four 7S lithium polymer battery packs with safety mechanisms for 90 volts of power and 10 miles of range
